Gestamp Wind wins two wind projects in Brazil

Madrid, December the 20th, 2013. Gestamp Wind the wind energy division of Gestamp Renewables (Corporación Gestamp) has win two new energy sale contracts in Brazil during 20 years for several projects, which will generate 50MWs. With these two parks, Gestamp Wind will own 404MWs in Brazil.

These wind parks suppose an additional investment of 70€ millions in Brazil. During the 20 years duration of the energy sale agreements, the earnings forecast is 180€ millions.

Gestamp wind is building 128MW in 5 Brazilian wind farms located in Río Grande do Norte, that will start generating power in 2014. Other parks in Pernambuco, Río Grande do Norte and Bahía are already generating 112MW.

Eduardo García Molina, Gestamp Wind Brazil's General Manager, stated that "with this new project, we consolidate our presence in Brazil as one of the most important markets for Gestamp Wind, that started the bid for Brazilian wind 5 years ago. With these projects, Gestamp Wind will be one of the most important wind energy generators in the country. Besides, Gestamp Wind has a project portfolio for over 500MW in several locations that will be shown to the Brazilian Government for their consideration".

About Gestamp Wind

Gestamp Wind is the wind energy division of Gestamp Renewables, specialized in the development, construction and operation of wind farms with projects in Europe, Brazil, EEUU, Turkey and South Africa. Gestamp Wind is one of the leading companies in the wind energy business. Gestamp Wind integrates vertically, the development, construction and operation of wind farms. The company has over 500 Mw in operation and an important pipeline of over 1,400 MW in the different markets where the company is currently active.
